

Sign Green with xyzmo SIGNificant - Reduce paper and emissions with our technology

2009-08-27 17:26:49

Saving Trees and Emissions, One Digital Signature at a Time

- Thanks to the SIGNificant Server it is very easy and convenient to enhance any existing infrastructure with all the necessary functionalities for a total paperless process. Beyond the possibility of capturing a handwritten signature also smart-cards, tokens and software certificates are supported.
- In addition to the paperless benefits of our solution, it also cuts down on emissions by reducing the need to mail documents via land, air and sea.
- Businesses of all sizes should consider the benefits of our solutions not only for their cost effectiveness, but for their ability to manifest an environmentally-responsible initiative and be a leader in sustainability.
- A medium sized company that chooses to use xyzmo SIGNificant's digital signatures saves 200,000 sheets of paper in one year which translates into one ton of paper
- Conserving a ton of copy paper also equals conserving three tons of wood and 19,075 gallons of waste water!

xyzmo SIGNificant's signature solutions offer a balance between cost-saving process improvements to increased productivity, but will also make your organization environmentally conscious by cutting the consumption of electricity, paper, fossil fuels, and the emission of greenhouse gases. xyzmo SIGNificant products are being used by leading companies in more than 10 countries and in various industries such as: telecommunications, banking, insurance, healthcare, pharmaceutical, manufacturing and others and help them meet their green initiatives.

Think of this Simple Process and Imagine the Benefits!

Nothing is easier than completing a form automatically simply by scanning/swiping your credit card or driver's license to obtain important information. Any additional required data can be captured via a soft keyboard. Signing and sealing documents are performed electronically, and can be automatically sent to the customer using the provided email address. Verification of the authenticity/integrity of documents and storage problems will no longer be an issue for your company and customers.
